Art Unit: 1724

In view of the fact that copendency has been established between this application and parent application Serial No. 09/566,034, the objection to the disclosure contained in the first paragraph on page 2 of the Office action dated December 7, 2004 is hereby withdrawn. The rejection of claims 1-15 over Patent Application Publication No. 2002/0014447 is also withdrawn.

In view of Applicant's amendment to the specification, contained in the response filed March 7, 2005, the new matter objection contained in the second paragraph on page 2 of the above noted Office action is hereby withdrawn.

Claims 1-15 are again provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2-6, 8-10, 14 and 15 of copending Application Serial No. 09/867,973. As pointed out in the previous Office action, although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant application do not preclude the presence of an antioxidant in the pellets of the chemically active filter member; and therefore, these claims do not distinguish over claims 2-6, 8-10, 14 and 15 of copending Application Serial No. 09/867,973. Applicant should note that the beneficial additive recited in the claims of said copending application also appears to be present in the recited concentration (see page 10, lines 13-14, of the specification of the copending application).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or

Art Unit: 1724

improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

The terminal disclaimer filed March 7, 2005 has not been accepted because it is not signed by an attorney or agent of record.

Also, the request to recognize Christopher C. Boehm as an associate attorney, filed November 30, 2005, has not been accepted because effective June 25, 2004 the associate power of attorney practice has been eliminated. The Office no longer accepts a power of attorney signed by a principal to name an associate power of attorney. See M.P.E.P. § 402.02.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 1724

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
